

# Finally, a business dialup plan that makes business sense.

No limits.  
No packages.  
No hassles.  
Just pay for what you use.

It's as simple as that.

Managing employees on the road has never been easier.  
Or less expensive.

Tired of senseless packages, unused minutes and the challenge of adding employees to your company's ISP account?

With Budget Dialup, billing is based on total *usage*, not the number of dialup accounts. There's no limit to the number of accounts that you can create, and you pay only for the actual dial-up time used. If you create 100 dial-up accounts and your users only connect for a total of 200 hours, then your bill will be for only 200 hours. At a rate of 49¢ per hour, that's only \$98.00 for the month.

No limits. No packages. No hassles. Just pay for what you use. It's as simple as that.

# Easy. Flexible. Inexpensive. Now, doesn't that make sense?

## Easy Administration

It's never been easier to manage employees on the road. No more worrying about last minute user additions, sorting individual statements, or forgotten passwords. Everything is easily controlled in a single administration screen. Why hasn't someone thought of this before?

- One administrative interface allows easy control for all user accounts
- Change passwords and add/delete users
- View customizable usage reports (great for managing expenses)
- Configure your choice of VPN solutions with the dialup software

## Flexible Access

Your employees can dial up across the country. Our local numbers cover 93% of the U.S., and an 800 number is available for extremely remote locations.

- Easy-to-use dialer helps non-technical employees log on with ease
- Users' email program can be easily configured to pick up company email while connected
- Over 2,200 local access numbers
- 800 number for extremely remote locations
- We use the Level 3 Communications Network—the same network used by the top ten ISPs in the country
- 24x7 customer support

## Inexpensive and Cost-Effective

Pay only for the connection time your company uses. No setup fees, no packages, no bundles. Just pay as you go. It's as simple as that.

- No setup fees
- No limit to the number of dialup users
- Local number access only 49¢ per hour (that's less than a penny per minute)
- 800 number access billed at \$2.94 per hour (only 4.9¢ per minute)
- Pay only for the actual time used
- One clear invoice, once a month, for your entire account
- No minimum for credit card billing (\$25.00 minimum for invoicing)

## Quantifying Cost-Effectiveness

One of our clients approached us to quantify the cost savings they could gain in switching to Budget Dialup. Hoping for at least a modest savings, they were shocked to find that their cost could be reduced from \$685 per month to only \$122.

Our client was paying for 30 dialup accounts, each at a fixed price of \$19.95 per month. As to be expected, only a handful were heavy users. And while they occasionally ran into charges for exceeding their monthly limits, most of the other accounts went unused.

Without limits on individual users, we could immediately save our client money in overuse charges. But the true savings came from eliminating the cost of unused minutes.

Since switching to the Budget Dialup Corporate Account, our client pays only for the minutes used, and has saved \$563 a month!
